

## TABLE OF CONTENTS

---

### 1 COMMAND REFERENCE

1.1	Common Conventions and Features .....	1 - 1
1.1.1	Syntax .....	1 - 1
1.1.2	Interactive Input .....	1 - 2
1.1.3	Commands Accepting the <b>range</b> Phrase .....	1 - 3
1.1.4	Online Help .....	1 - 6
1.2	Commands by Function .....	1 - 7
1.2.1	Specify Program Control .....	1 - 7
1.2.2	Specify Special Calculation Modes .....	1 - 7
1.2.3	Input Problem Geometry .....	1 - 8
1.2.4	Specify Block Deformability .....	1 - 9
1.2.5	Assign Joint Constitutive Models and Properties .....	1 - 10
1.2.6	Assign Initial Conditions .....	1 - 10
1.2.7	Apply Boundary Conditions .....	1 - 11
1.2.8	Specify Structural Support .....	1 - 11
1.2.9	Specify User-Defined Variables or Functions .....	1 - 11
1.2.10	Specify Solution Conditions .....	1 - 12
1.2.11	Monitor Model Conditions during the Solution Process .....	1 - 12
1.2.12	Solve the Problem .....	1 - 12
1.2.13	Generate Model Output .....	1 - 13
1.2.14	Access the DOS System .....	1 - 13
1.3	<b>UDEC</b> Commands – Detailed Listing .....	1 - 13

**TABLES**

---

Table 1.1	Interactive input editing keys .....	1 - 2
Table 1.2	Constitutive models for deformable blocks .....	1 - 39
Table 1.3	Joint constitutive models .....	1 - 40
Table 1.4	Property keywords for the <b>JOINT model</b> command .....	1 - 117
Table 1.5	Switches to modify plotting keywords .....	1 - 150
Table 1.6	Color switch keywords .....	1 - 174
Table 1.7	Keywords affected by the <b>line</b> switch .....	1 - 175
Table 1.8	Summary of <b>SET</b> keywords .....	1 - 233
Table 1.9	Color scales (nscal) .....	1 - 239
Table 1.10	Available colors .....	1 - 239
Table 1.11	Property groups by failure segment for the bilinear, strain-hardening/softening ubiquitous-joint model .....	1 - 318

## FIGURES

---

Figure 1.1	<b>TABLE 1</b> (0,0) ( $u_{n1}, \sigma_{n1}$ ) ( $u_{n2}, \sigma_{n2}$ ) ( $u_{n3}, \sigma_{n3}$ ) .....	1 - 121
Figure 1.2	Joint set parameters (joint region is defined by <b>JREGION id 1</b> $x1,y1$ $x2,y2$ $x3,y3$ $x4,y4$ ) .....	1 - 127
Figure 1.3	Definition for direction of shear displacement .....	1 - 155
Figure 1.4	<b>TABLE 1</b> (0,0) ( $u_{n1}, \sigma_{n1}$ ) ( $u_{n2}, \sigma_{n2}$ ) ( $u_{n3}, \sigma_{n3}$ ) .....	1 - 207
Figure 1.5	Strength/stress ratios for the Mohr-Coulomb and Hoek-Brown failure criteria	1 - 215

## EXAMPLES

---

Example 1.1	Use of the <b>PFIX</b> command .....	1 - 145
-------------	--------------------------------------	---------
